DETAILS FOR ALL PROGRAMS

All programs include:

- Our Corn Maze - A different theme every year!
  There are two distinct interactive mazes that will allow students and
  teachers to choose the appropriate level of challenge

- The Barnyard Adventure Area
  Complete with a tire mountain, double tunnel slide, a challenging rope
  maze, a spider web to climb, duck races, washer toss and a straw bale
  climbing area!

- Picnic tables, clean portable washrooms with hand washing stations and
  fresh, farm-grown apple snacks courtesy of Noggins Farm!

  Programs can be mixed or matched
  to meet the needs of split classes and/or teacher preferences.

To book your field trip:
Please fill out our reservation form found on the school tour section of our website
email completed forms to tours@nogginsfarm.ca
or Fax: (902) 542-1791
Questions? Simply phone our Agritourism office at (902) 542-5515 ext. 23
  See you on the farm!

with
LESSONS in AGRICULTURE

Fall Educational Field Trips
September-October
Primary to Grade 6
**Fall Harvest at the Farm**

Grade Level: Primary – Grade 2  
Curriculum Correlations: Science, Language Arts and Physical Education

Harvest time is one of the best times to come to the farm! The market is bursting with fresh produce and everyone is hard at work in the fields and orchards. We will take a walk to the apple orchard and visit the pumpkin patch discussing plant cycles and the seasons. Along the way we will engage our five senses to discover the wondrous world of a busy farm at harvest time. While in the orchard all students will pick a small bag of apples to take home. This trip provides a wealth of experiences for creative writing opportunities and lays an important foundation for students to understand where our food comes from.

**Investigating Soils – Exploring a Precious Resource**

Grade Level: Grade 3  
Curriculum Correlation: Science and Physical Education

Take an Earth walk to discover the wonders of the soil beneath our feet! We will visit several different locations on the farm to compare the uses and qualities of our soil. We will test for pH, percolation and compaction at our sampling sites to help us determine the properties of soil and how they can affect plants, animals and us! While in the orchard, students will pick a small bag of apples to take home...a souvenir of healthy soil!

**Historical Journey – Travelling Back in Time!**

Grade Level: Grade 4  
Curriculum Correlation: Science, Social Studies, and Physical Education

Hike through our beautiful historic walking trail in the footsteps of many who have come before us. Through the course of our walk we will explore how our land has been used for thousands of years before Noggins Farm even existed! We will visit the remains of an Acadian settlement and stand on the edge of a working dyke to watch the amazing tides. We will view an ancient Mi’kmaq campsite and the remains of a New England Planter’s gristmill. Along our journey all students will be given the opportunity to pick a small bag of apples to take home. Everyone will develop a greater knowledge and appreciation of the culture sites on the farm that make this land so special.

**Evolution and Technology**

Grade Level: 5 and 6  
Curriculum Correlation: Science and Physical Education

Farming began with a hoe, pitchfork and a horse-drawn plough. Much has changed over the years! We will visit the packinghouse, apple storage facility and farm market to see what goes on “behind the scenes” at a busy farm today. There are many different types of technology used in modern day farming and we will discuss how this relates to local farming as well as the global community. Finally we will explore the corn maze and learn about the technology used to design and create it. All students will get to pick a small bag of apples to take home, a wonderful token of sustainable farming practices!

**COST FOR ALL PROGRAMS**

$6.50 per student, tax included.  
Teachers, EAs and up to one chaperone per five students are free of charge. Additional chaperones pay the student rate of $6.50 per person. Invoices will be provided with HST broken out for your records.
